

Quarterly Operations Report

This report summarizes the document processing platform during the third quarter. It covers volume, regional teams and the incidents that affected availability.

1. Summary

The platform processed more documents than in any previous quarter while keeping the failure rate below the agreed service level.

- Processed 1.2 million pages across all tenants
- Median time to first result fell to 4.1 seconds
- Two critical incidents were resolved within the target window
- Storage costs decreased by 12 percent after lifecycle rules

2. Processing volume

2.1 Documents by type

Type	Documents	Pages	Avg time (s)
PDF (digital)	182,400	951,220	0.8
PDF (scanned)	41,730	228,915	38.2
Images	65,110	65,110	1.4
Word	22,905	110,340	0.3
Spreadsheets	8,412	20,101	0.5
Email	15,066	15,066	0.2

Scanned PDFs remain the most expensive category because every page requires OCR.

2.2 Regional teams

Region	Lead	Headcount	Budget (USD)
North America	A. Johnson	14	1,240,000
Latin America	M. Hernández	9	610,000
Europe	K. Müller	11	980,000
Asia Pacific	S. Tanaka	7	540,000

3. Incident log

The following table lists every incident opened during the quarter, ordered by identifier.

4. Next steps

- Split large PDFs into page-range subtasks
- Offer Markdown and chunked output for retrieval pipelines
- Add antivirus scanning before processing

The operations team will review these actions at the next monthly meeting.
